

# Steven Katkowsky

***Turning the bathroom and kitchen that everyone has into the bathroom and kitchen that everyone wants.***

Steven Katkowsky, TV and radio personality, is one of the most popular speakers at home and garden shows. He is also a regular on ABC TV. At this weekend's event, he'll unveil his new seminar, "**Going in Style**". *Creating the illusion of size, and adding up to three times the storage space in your small 5X8 bathroom, and creating your dream baby boomer bathroom.*

Steven says that nearly every house in the United States has a standard five by eight foot bathroom. Steven will show how---without moving any walls---people can increase useable wall space by 40 percent, triple medicine cabinet space, triple useable storage in the same size vanity cabinet, and get 15 percent more counter space. "It's the same five by eight bathroom, but when you're done, it almost seems like walking into someone's living room", says Steven. "People always say it fixes everything they didn't like about their bathroom".

Along with his new dream bathroom seminar, Steven will present "**The Reincarnitchen of your Small 9X10 Kitchen**". *Creating the illusion of size and adding up to 3 times the storage space in your small, or large, kitchen.* In this show Steven will also offer some cool design tips and affordable green ideas.

Steven also literally wrote the book on how **not** to get ripped off when hiring a contractor: "**Danger, Construction Zone. Your Guided Tour to a Successful Remodeling Project**". In his book Steven teaches, among other things, how to avoid the greatest pitfalls of a remodeling project, and what to ask a contractor when he or she comes to your house for the first time.
